

# Top 5 things you can do at home

**75<sup>by</sup>35**  
Cut emissions by 75% by 2035

## Energy

Heating, lighting and cooling create significant emissions and power bills.

- Switch to a renewable power company. See the [Green Electricity Guide](#) for rankings.
- Install rooftop solar.
- Use LED lightbulbs. They will also [reduce your power bill](#).
- Switch to a reverse cycle AC unit.
- Airdry your laundry – [dryers consume a lot of power](#).

## Transport

Your car can account for up to half of your household emissions.

- Use public transport, an e-bike or bicycle.
- Make your next car electric.

## Gas

[Gas stove use](#) is estimated to cause 12% of childhood asthma in Australia.

- Replace gas stoves with induction stoves. [Commit to quit gas](#).
- Switch heaters and hot water systems to electric appliances – [you could save over \\$1,800 a year](#).

## Waste

When organic waste decomposes, carbon dioxide and methane gas is created.

- Buy only what you need.
- Buy locally grown food.
- Choose recycled and recyclable containers.
- Compost and grow your own vegetables.

## Money

Your super is your power to invest in a better future. Not fossil fuels.

- Move your money into a fund that does not invest in oil or gas. [See how your fund stacks up](#)
- Move to a bank that does not invest in fossil fuels.
