Your MP's State & postcode*

Date

Dear John Smith MP,

As one of your local constituents, I'm writing to urge you to support the Climate Change Bill Zali Steggall will introduce into Federal Parliament. In this time of crisis we are reminded we are one community not isolated from global events and their impact. It shows the need to plan ahead and prepare as best we can.

I believe that climate change is a real threat to our safety and a moral issue that the Australian Government must take steps to plan and prepare for. This is why I am calling on you as my MP to represent my views and those of our community in Canberra.

I support the proposed Climate Change legislation because I think it's vital that we have a national framework that ensures Australia has:

- A detailed risk assessment to the challenges of a warming climate across all sectors
- National plans for adapting to those challenges
- National long-term plans for reducing greenhouse gas emissions
- Transparent monitoring, reporting and accountability

This issue will affect how I vote in the next election. Thank you for listening to me and your electorate.

Yours sincerely,

Name and signature

Dear

As one of your local constituents, I'm writing to urge you to support the Climate Change Bill Zali Steggall will introduce into Federal Parliament. In this time of crisis we are reminded we are one community not isolated from global events and their impact. It shows the need to plan ahead and prepare as best we can.

I believe that climate change is a real threat to our safety and a moral issue that the Australian Government must take steps to plan and prepare for. This is why I am calling on you as my MP to represent my views and those of our community in Canberra.

I support the proposed Climate Change legislation because I think it's vital that we have a national framework that ensures Australia has:

- A detailed risk assessment to the challenges of a warming climate across all sectors
- National plans for adapting to those challenges
- National long-term plans for reducing greenhouse gas emissions
- Transparent monitoring, reporting and accountability

This issue will affect how I vote in the next election. Thank you for listening to me and your electorate.
